

Mensch-Maschine-Interaktion

Human-Machine Interaction

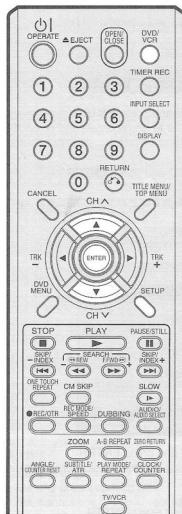

Heinrich Hußmann
Ludwig-Maximilians-Universität München
Wintersemester 2007/2008

Example: „I am not able to program my VCR.“

Timer recording

The timer recording system allows you to select the date, time and channel and record the desired programs. Up to 8 timer programs within a month can be stored in this unit.

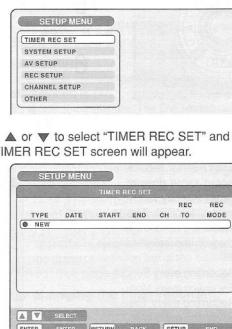

NOTE:
In the event of a power failure the data of the automatic recording will be maintained in the built-in memory for about 30 minutes. Also, the clock will continue to run for this period of time. Thereafter the data will be deleted. When the power resumes, the time display will change to "0:00" that the timer setting will have to be set.

Setting timer recording

- Turn ON the TV and select its AV channel (this may be labelled EX / AUX etc.)
- Load a recordable DVD or video tape.
- Press DVD/VCR to select the appropriate mode.
- Confirm that the clock is indicating the correct time.

Example: Set the recording mode to LP and record on DVD; the T program is on channel 1 starting at 20:00 and stopping at 23:00 on date of 20th.

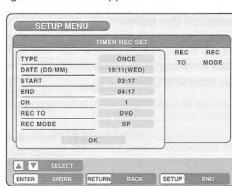

- Press **SETUP**.
The **SETUP MENU** screen appears.

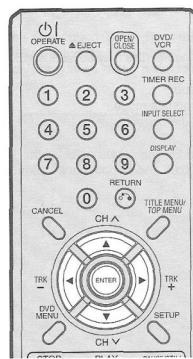

- Press **▲** or **▼** to select "TIMER REC SET" and press **ENTER**.
The **TIMER REC SET** screen will appear.

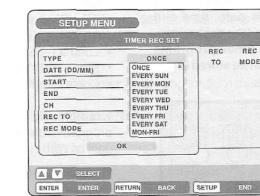

- Press **▲** or **▼** to select "NEW" and press **ENTER**.
The program screen will appear.

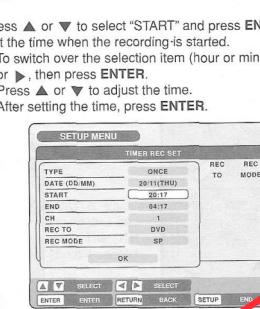

Timer recording

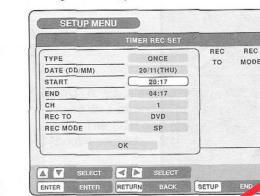

- Press **▲** or **▼** to select "TYPE" and press **ENTER**.
Press **▲** or **▼** to select "ONCE" from the list and press **ENTER**.

- Press **▲** or **▼** to select "DATE" and press **ENTER**.
Press **▲** or **▼** to select the date to be recorded and press **ENTER**.

- Press **▲** or **▼** to select "START" and press **ENTER**.
Set the time when the recording is started.
To switch over the selection item (hour or minute), press **◀** or **▶**, then press **ENTER**.

- Press **▲** or **▼** to adjust the time.

- After setting the time, press **ENTER**.

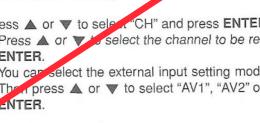

- Press **▲** or **▼** to select "END" and press **ENTER**.
Set the stopping time in the same manner for setting the starting time of timer recording.

- Press **▲** or **▼** to select "CH" and press **ENTER**.
Press **▲** or **▼** to select the channel to be recorded and press **ENTER**.

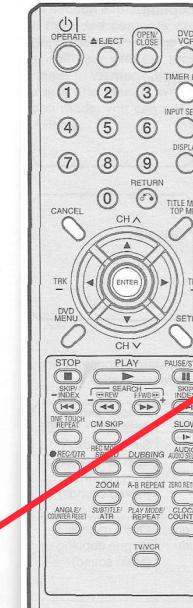

- You can select the external input setting mode by pressing **▶**. Then press **▲** or **▼** to select "AV1", "AV2" or "AV3" and press **ENTER**.

- Press **▲** or **▼** to select "REC TO" and press **ENTER**.
Select the media (DVD or VCR) to be recorded from the list and press **ENTER**.

Timer recording

- Select "OK" and press **ENTER**. The timer program is determined and the **TIMER REC SET** screen appears again.

- When you enter the other program for the timer recording, repeat the steps 3 to 11.

- Press **SETUP**. The **TIMER REC SET** screen disappears and the display will return to the normal screen.

- Press **TIMER REC**. The timer indicator "■" will appear on the display and the unit stands by for recording.

- If the program is DVD recording only, the unit will change to VCR mode automatically.(The DVD mode cannot be selected.)
- If the program is VCR recording only, the unit will change to DVD mode automatically.(The VCR mode cannot be selected.)
- If the programs are DVD and VCR recording, the unit will turn off. If you want to use the unit, press **TIMER REC** again to deactivate the timer.
- If the clock symbol (■) blinks in the display in spite of the pressing of **TIMER REC**, the cassette may not have been loaded yet. (see page 42)
- If the cassette is ejected in spite of the pressing of **TIMER REC**, the erase prevention tab of the cassette may have been removed. (see page 42)

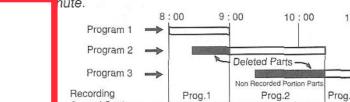

Checking or changing the timer recording

When you want to check the selected timer recording, follow the steps 1 and 2 of "Setting timer recording" and display the **TIMER REC SET** screen. To change the timer recording, select the program to be changed and press **ENTER**. The changing method is the same as that for the recording a program for the first time.

Cancelling the timer recording

Display the **TIMER REC SET** screen.
Select the program you want to cancel and press **CANCEL**, then the selected program will be erased from the timer recording list.

In case Timer programs-overlap
Do not overlap timer programs as portions of the conflicting programs will be lost. The first recording time has priority over the next recording time as shown in the diagram below.
In this case, the next recording time is delayed a maximum of about 1 minute.

14 Press **TIMER REC**. The timer indicator "■" will appear on the display and the unit stands by for recording.

Vorbemerkung: Deutsch und Englisch

- Viele Materialien sind nur in englischer Sprache verfügbar
 - ...oder in besserer Qualität/Aktualität
- Wissenschaftliches Arbeiten ist international
 - Die Wissenschaftssprache ist englisch
 - Austausch von Materialien zwischen Lehre und Forschung in deutschen Sprache ist schwierig
 - Viele Begriffe sind in englischer Sprache geprägt und schwer zu übersetzen
- Konsequenz:
 - Lehrmaterialien in englischer Sprache!
 - Unterricht in deutscher Sprache.

Organisatorisches

- Die Lehrveranstaltung (2V+2Ü) ist eine Mischung aus:
 - Vorlesung (13 Doppelstunden)
 - 7 Übungen mit Präsentation ergänzenden Stoffs (“extension topic”)
 - Übungen zur Durchführung von Experimenten (6 Aufgabenblätter)
 - Diskussions- und Unterstützungs-Übungen
- Einteilung für die Übungen in 4er-Gruppen (***per Los!***)
- Für Leistungsnachweis:
 - Erfolgreiche Bearbeitung von allen 6 Aufgabenblättern (als Gruppe)
 - *Lesen und schriftliches Zusammenfassen* von wiss. Arbeiten
 - Teilnahme an einer zusätzlichen Benutzerstudie (verschiedene Angebote)
 - » Aus Projekt-, Diplom- und Forschungsarbeiten
- Einbringung in mündliche Prüfung
 - Fachgebiet MM für Medieninformatik-Studierende
 - Fachgebiet A für Informatik-Studierende
 - 2 SWS nur Vorlesung, 4 SWS mit Übungsschein,
3 SWS für Vorlesung + ergänzende Themen aus der Übung (E1-E7)
- Anerkennung für Bachelor auf Anfrage möglich (6 ECTS-Credits)

1 Introduction and History

- 1.1 Motivation
- 1.2 Terms and concepts
- 1.3 Overview of the course
- 1.4 A brief history of HCI

Why is Usability Important?

- Improving usability can
 - increase productivity of users
 - reduce costs (support, efficiency)
 - increase sales/revenue
 - » E.g. Web shop: In the web, the competitor is just one click away!
 - enhance customer loyalty
 - win new customers
- Several case studies that show the benefit of usability
- Usability studies can trigger new ideas
- Usability is often considered as sign of quality

Interaction Design and Product Design

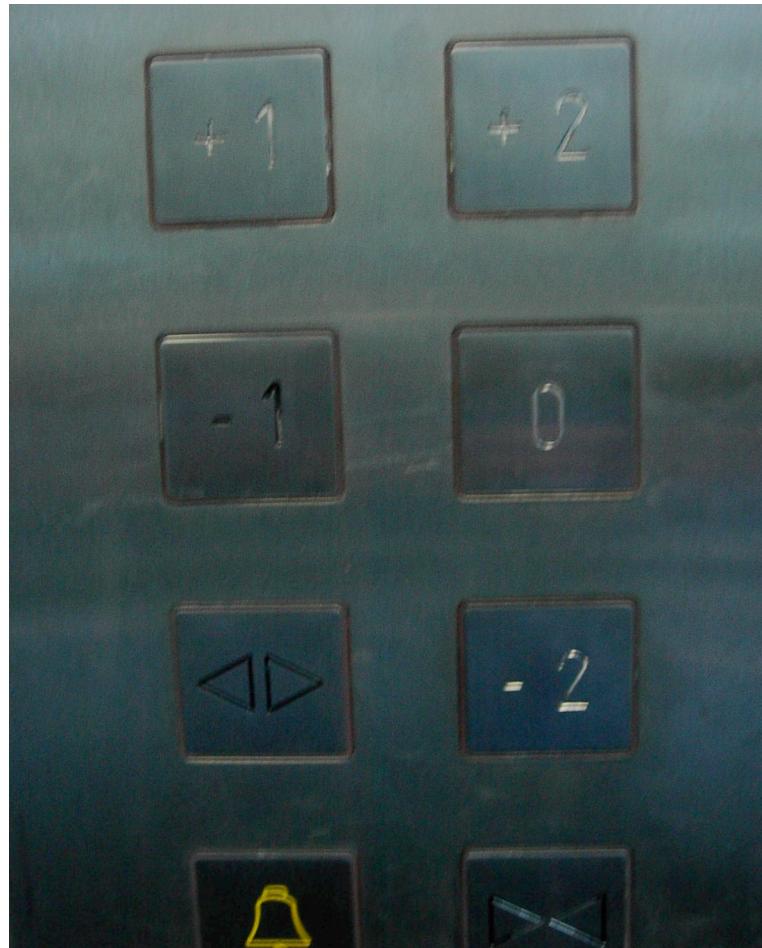

- Product design determines the appearance of the product
- Interaction design determines the usability of the product
- Both are closely coupled

Sophisticated Design does not entail Usability

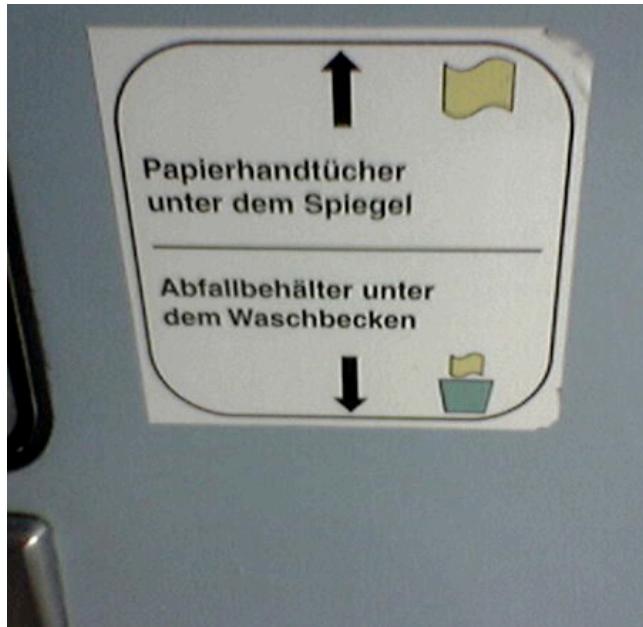

CS Building in Saarbrücken

DFKI in Saarbrücken

(Photos A. Butz)

Usability applies to a wide range of systems

(German Rail IC-Train)

(Floor lamp in hotel room, Oulu)

- Signs and explanations for things that are usually obvious are an indicator for a potential problem.

There are many jobs that require an understanding of usability

- **Interaction designers** - people involved in the design of all the interactive aspects of a product
- **Usability engineers** - people who focus on evaluating products, using usability methods and principles
- **Web designers** - people who develop and create the visual design of websites, such as layouts
- **Information architects** - people who come up with ideas of how to plan and structure interactive products
- **User experience designers** - people who do all the above but who may also carry out field studies to inform the design of products

Example: Currency Converter

- Design a user interface for the following scenario:
Mary works at XY-import-export GmbH in Munich. She checks frequently prices for goods in the USA and in Japan. For calculating her budget she needs to convert them into Euro. Sometimes when she writes offers, she converts her company's sales prices (which are in Euro) into US\$ or Yen.
- Task: draw a sketch of a user interface for an application that supports Mary in her work.
- Think about how you would integrate such an application with her current computer system and software infrastructure

1 Introduction and History

1.1 Motivation

1.2 Terms and concepts

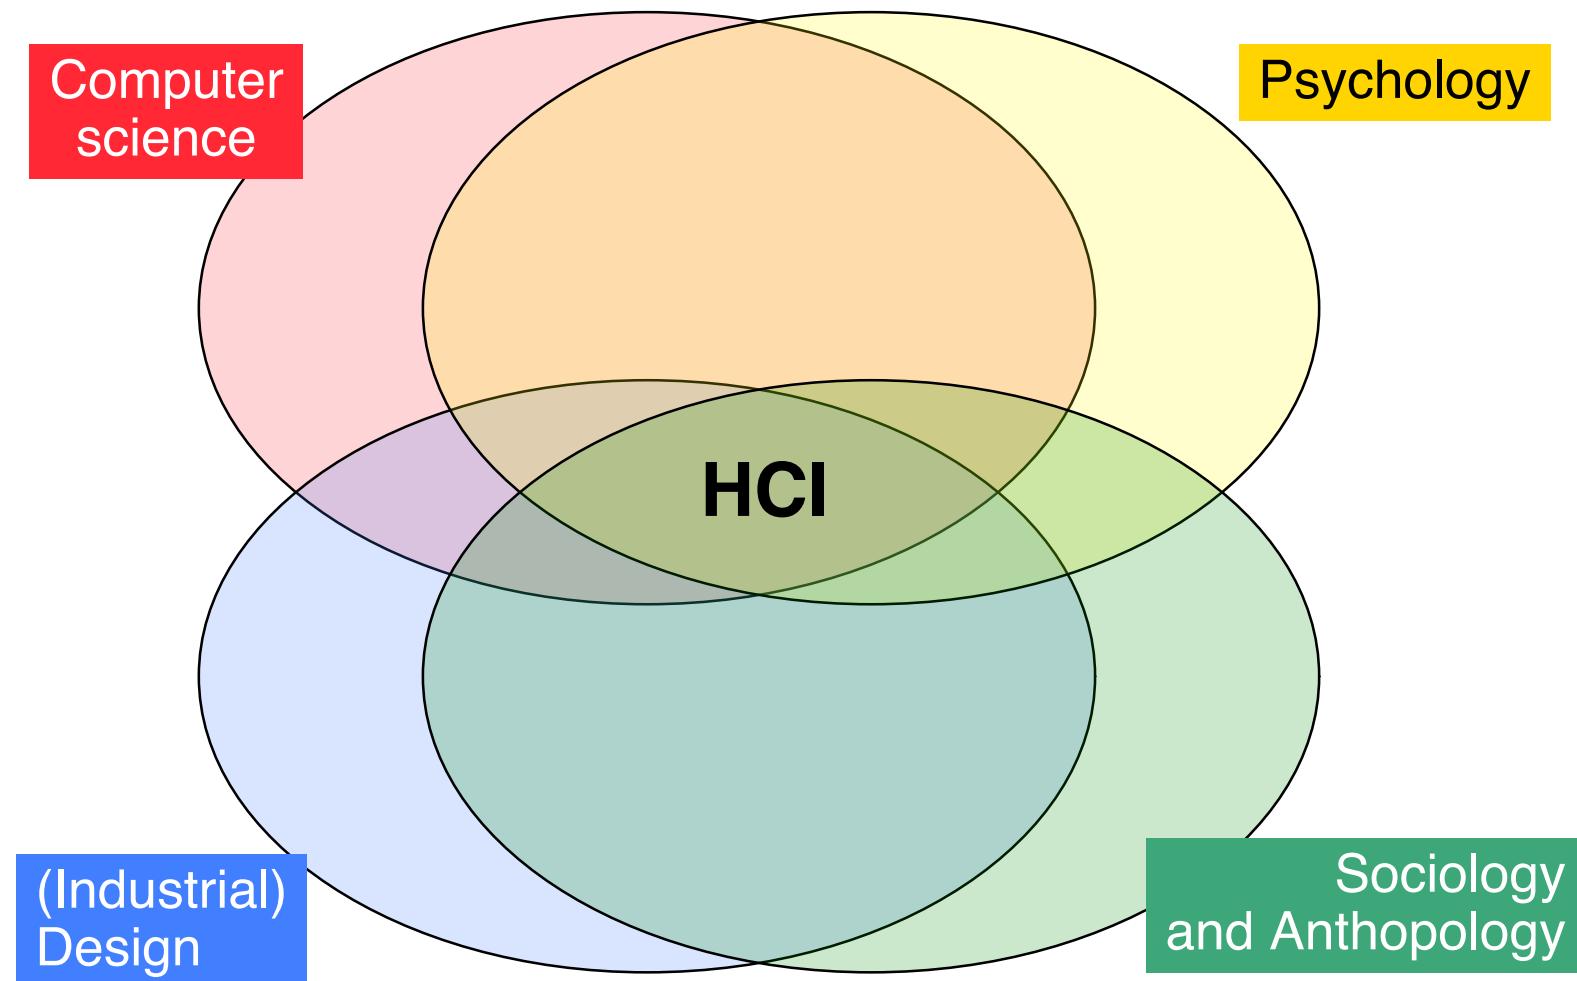

1.3 Overview of the course

1.4 A brief history of HCI

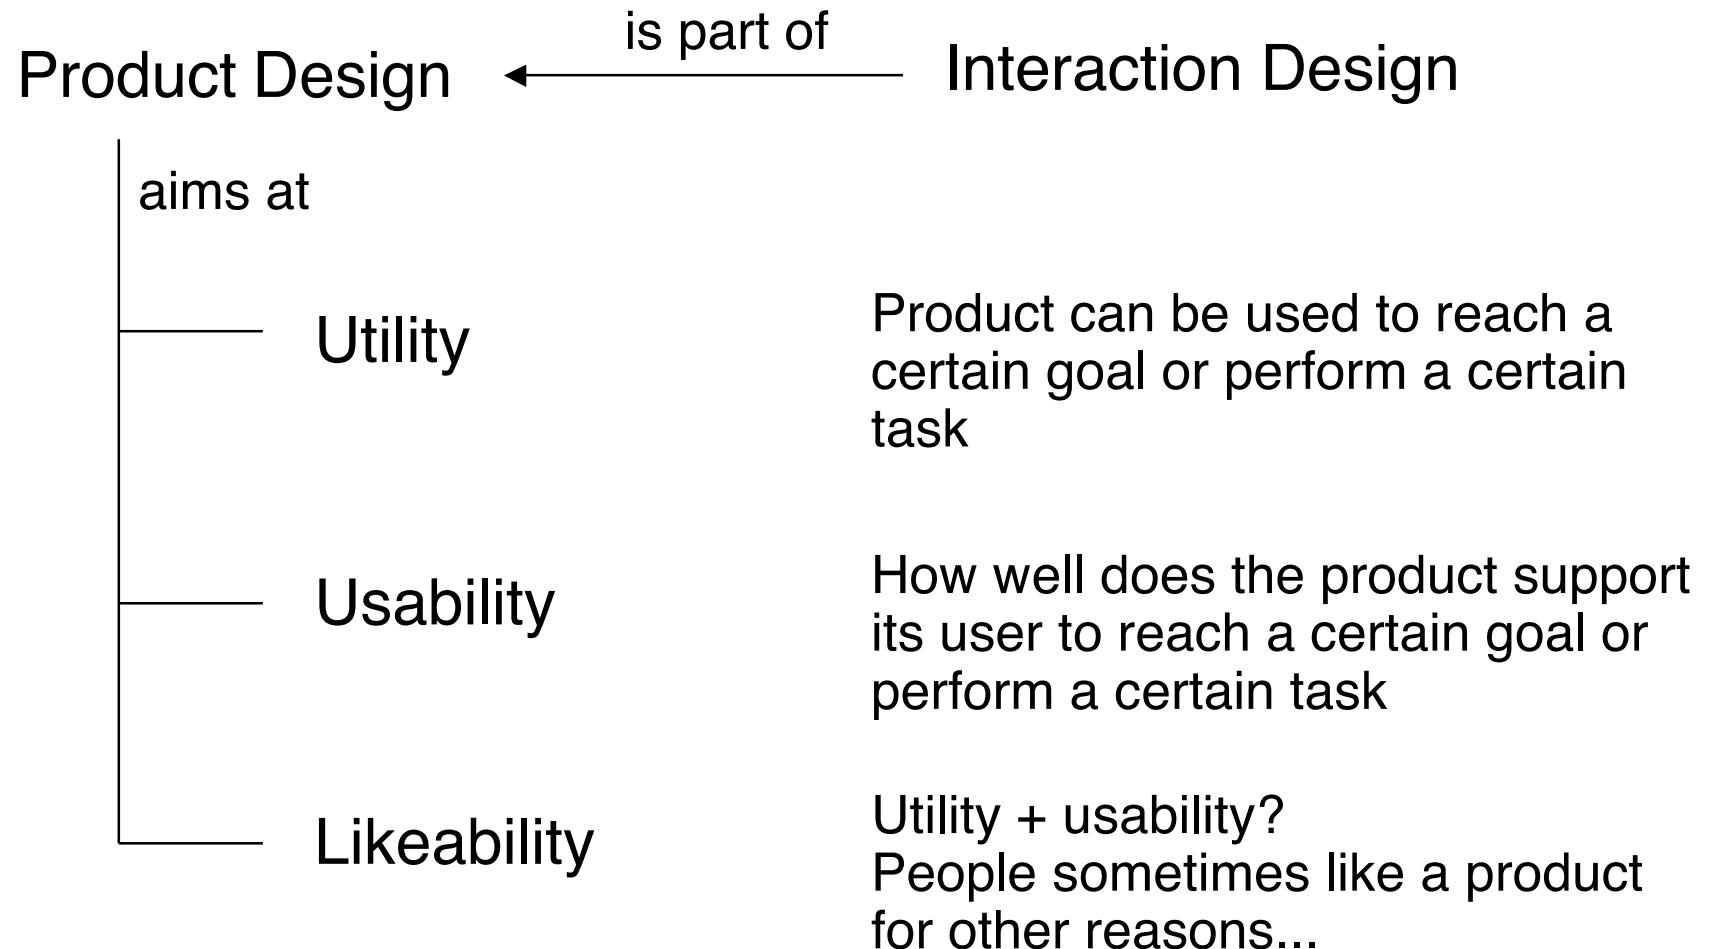

What is the right title for the lecture?

- Mensch-Maschine-Interaktion / Human-Machine Interaction (HMI)
 - “Man-Machine Interaction” politically incorrect
 - Study of the ways how humans use machines
- Mensch-Computer-Interaction / Human-Computer Interaction (**HCI**)
 - More special, main focus of this lecture
 - *“Human-computer interaction is a discipline concerned with the design, evaluation and implementation of interactive computing systems for human use and with the study of major phenomena surrounding them”*
(working definition in the ACM SIGCHI Curricula for HCI)
- Interaktionsdesign / Interaction Design
 - More general than HMI
 - *“designing interactive products to support people in their everyday and working live”*
 - “interaction design is related to software engineering in the same way as architecture is related to civil engineering”
- Benutzerfreundlichkeit / Usability
 - The overall goal of interaction design

HCI as an interdisciplinary field

Aspects of Product Design

Usability 101 (by Jakob Nielson)

- “*Usability is a quality attribute that assesses how easy user interfaces are to use. The word ‘usability’ also refers to methods for improving ease-of-use during the design process.*”
- Usability has five quality components:
 - **Learnability:** How easy is it for users to accomplish basic tasks the first time they encounter the design?
 - **Efficiency:** Once users have learned the design, how quickly can they perform tasks?
 - **Memorability:** When users return to the design after a period of not using it, how easily can they reestablish proficiency?
 - **Errors:** How many errors do users make, how severe are these errors, and how easily can they recover from the errors?
 - **Satisfaction:** How pleasant is it to use the design?

1 Introduction and History

1.1 Motivation

1.2 Terms and concepts

1.3 Overview of the course

1.4 A brief history of HCI

Use and Context

U1 Social Organization and Work

U3 Human-Machine Fit and Adaptation

U2 Application Areas

Human

H1 Human Information Processing

H2 Language, Communication and Interaction

H3 Ergonomics

Computer

C2 Dialogue Techniques

C3 Dialogue Genre

C4 Computer Graphics

C5 Dialogue Architecture

D2 Implementation
Techniques and Tools

Development Process

from ACM SIGCHI Curricula for HCI

The Development Process

Outline (1)

1. Introduction and History

Motivation, terms and concepts, course overview, history

2. Basic HCI Principles

Users, Golden Rules, Psychology of Everyday Action, GOMS

Extension topic E1: Fitt's law

3. Capabilities of Humans and Machines

Human senses, cognitive abilities, memory, hardware technologies for interaction, natural and intuitive interaction

Extension topic E2: Keystroke level modeling

Extension topic E3: Advanced interface technologies

4. User-Centered Development Process

Iterative development, user-centered development, prototyping

Extension topic E4: Paper prototyping

5. Analyzing the Requirements

Focus groups, ethnographic observation, task analysis, scenarios and use cases, conceptual models

Outline (2)

6. Designing Interactive Systems

Paradigms, styles and principles of interaction, activity-based and object-oriented design, describing and specifying interactive systems, design patterns

Extension topic E5: Creativity techniques

7. Implementing Interactive Systems

Constraints, mapping, implementation technologies for interactive systems, standards and guidelines

Evaluation

Analytic and empirical evaluation, user studies, heuristic evaluation

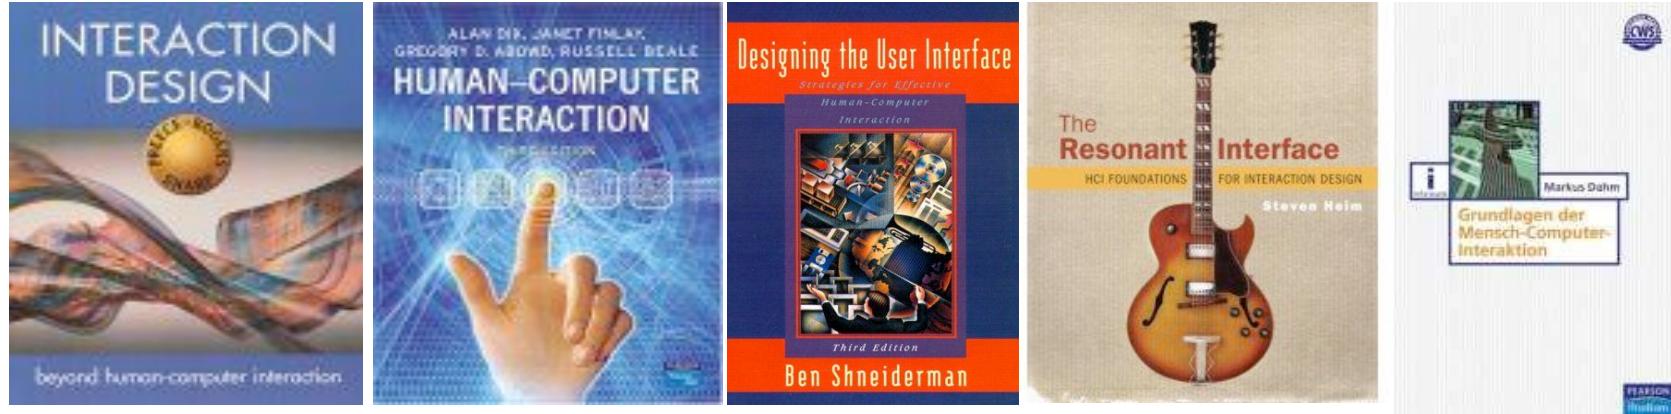

Extension topic E6: Basics of study design

Extension topic E7: Statistics for evaluation

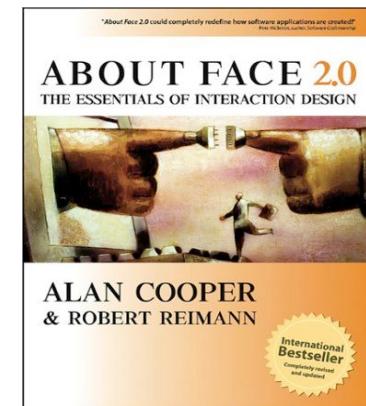

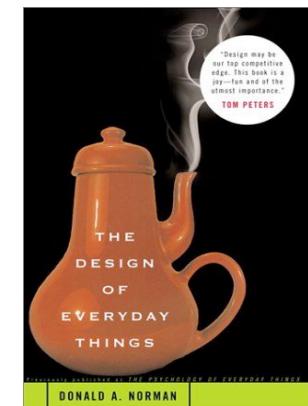

9. Outlook

Usability in industrial practice, outlook to follow-up lecture (Web usability, mobile usability)

1 Introduction and History

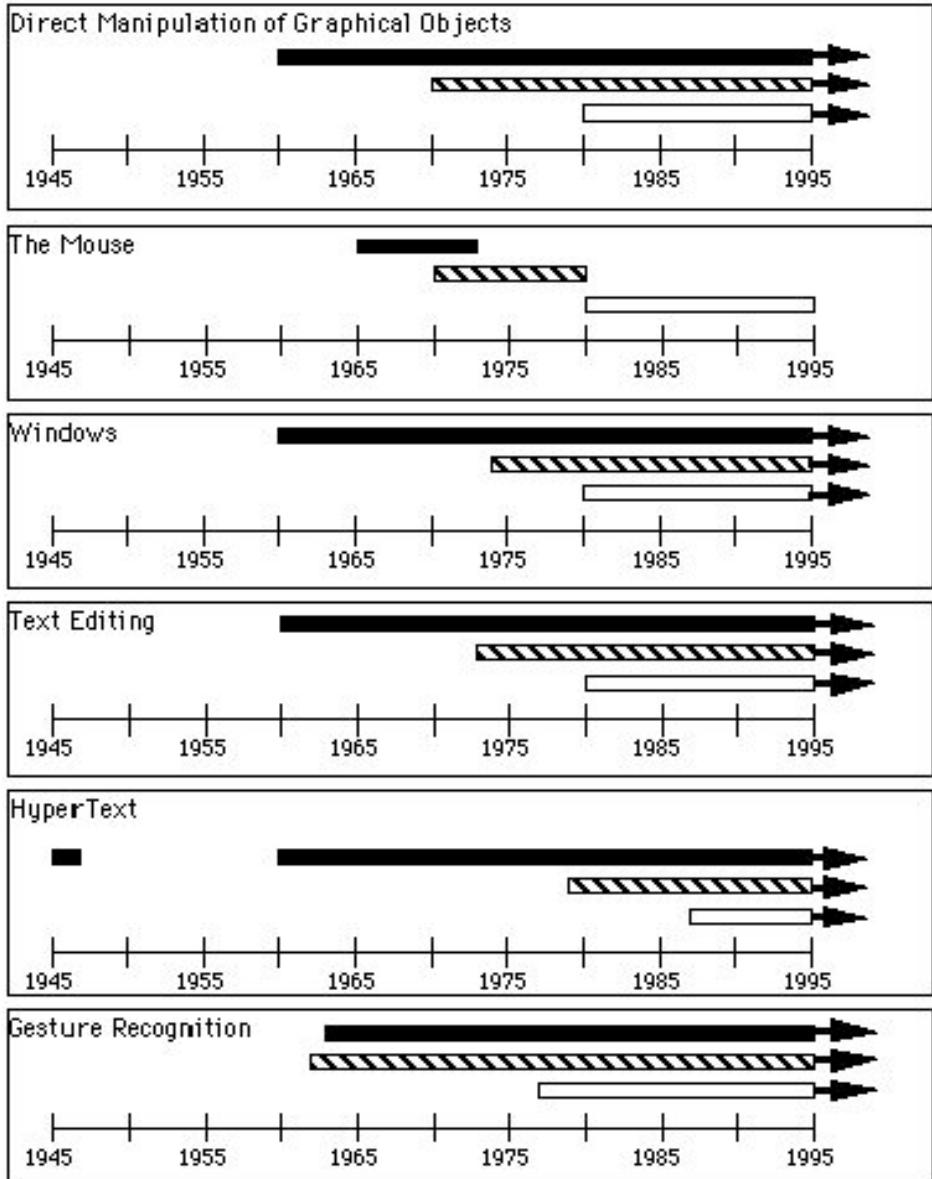

- 1.1 Motivation
- 1.2 Terms and concepts
- 1.3 Overview of the course
- 1.4 A brief history of HCI

Evolution of HCI ‘interfaces’

- **50s** - Interface at the hardware level for engineers - switch panels
- **60-70s** - interface at the programming level - COBOL, FORTRAN
- **70-90s** - Interface at the terminal level - command languages
- **80s** - Interface at the interaction dialogue level - GUIs, multimedia
- **90s** - Interface at the work setting - networked systems, groupware
- **00s** - Interface becomes pervasive
 - RF tags, Bluetooth technology, mobile devices, consumer electronics, interactive screens, embedded technology

*From B. Myers
"Brief History of HCI"*

A Brief History of HCI

- Early machines used batch processing (e.g. punch card machines)
- Terminals with command line interfaces
- Graphical user interfaces with pointing device
- Multimodal user interfaces

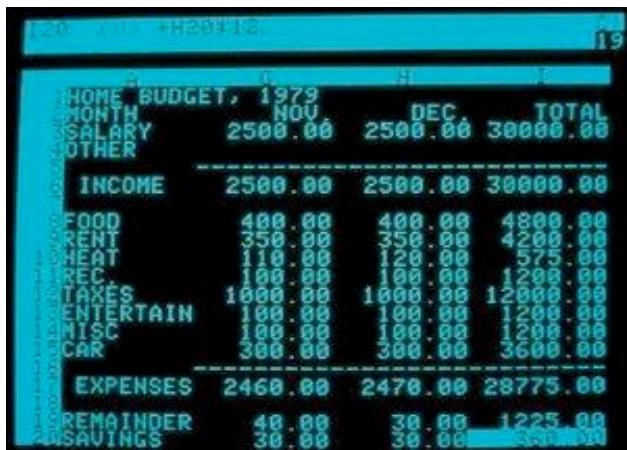

VisiCalc - Widespread use of an Interactive Application

A screenshot of the VisiCalc software running on an Apple II computer. The window title is "MAIN - LABEL ARITH / 1.1". The spreadsheet displays a transaction history with columns for PAYEE, CHECK, DEPOSIT, and BALANCE. The data includes entries for SEARS, VISA, JOES MKT, and GAS CO., with a total balance of 250.94. The date 01/04/79 is visible at the bottom right.

PAYEE	CHECK	DEPOSIT	BALANCE
SEARS	14.22		235.72
VISA	50.75		184.97
JOES MKT	20.11		164.86
GAS CO.	19.84	250.94	315.00

VisiCalc Screen, early Alpha 1/4/79

A screenshot of the first version of VisiCalc showing a budget spreadsheet for November and December 1979. The table includes columns for MONTH, NOV, DEC, and TOTAL. It lists income from salary and other sources, expenses for food, rent, heat, etc., and calculates a remainder and savings.

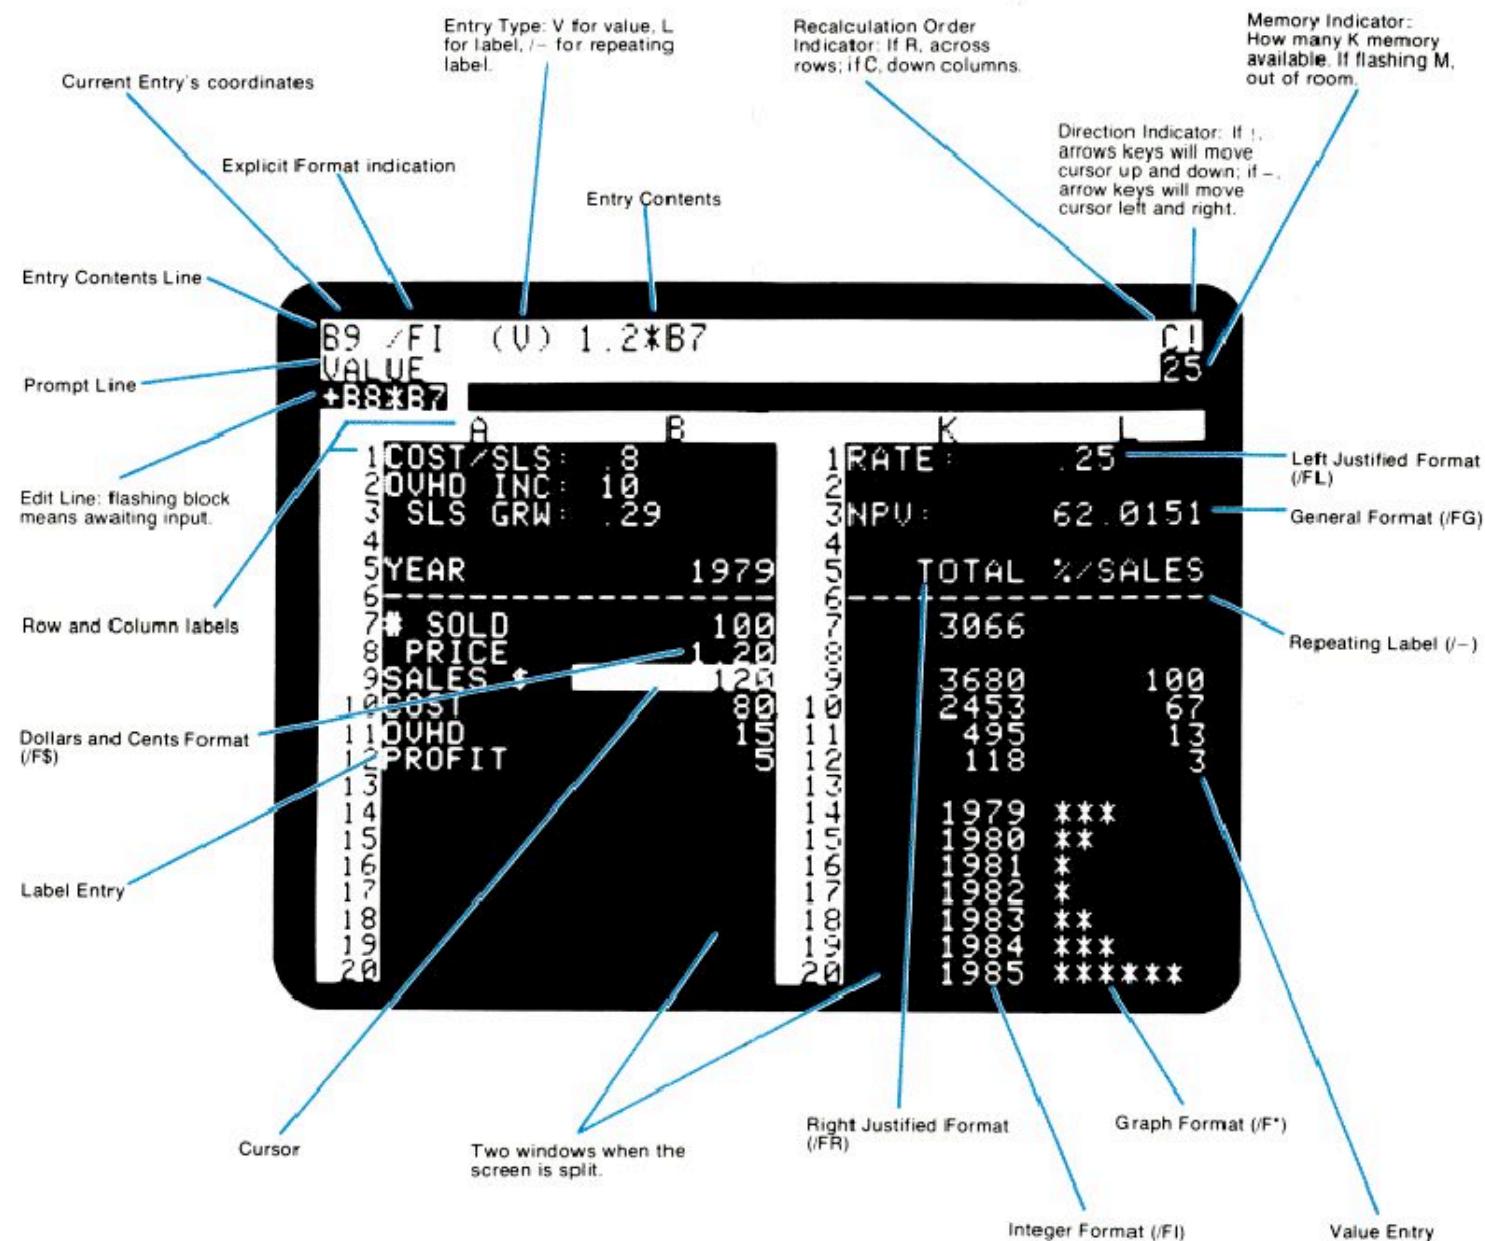

MONTH	NOV	DEC	TOTAL
SALARY	2500.00	2500.00	30000.00
OTHER			
INCOME	2500.00	2500.00	30000.00
FOOD	400.00	400.00	4800.00
RENT	350.00	350.00	4200.00
HEAT	10.00	120.00	570.00
REC	100.00	100.00	1200.00
TAXES	1000.00	1000.00	12000.00
ENTERTAIN	100.00	100.00	1200.00
MISC	100.00	100.00	1200.00
CAR	300.00	300.00	3600.00
EXPENSES	2460.00	2470.00	28775.00
REMAINDER	40.00	30.00	1225.00
SAVINGS	30.00	30.00	30.00

First version of VisiCalc screenshot

- Instantly calculating electronic spreadsheet
 - D. Bricklin/J. Frankston 1979
 - For Apple II computers
- Significant value to non-technical users
 - Usability was key...
- Early killer app for PCs
 - Motivated IBM to enter the PC market
