

Assignment 7 – Human-Computer Interaction 2

Note: Exercises are voluntary with the goal of preparing you for the final exam. The sample solution will be presented during the exercise sessions on Monday.

Concepts and coding skills taught in these exercises are relevant for the exam.

Over the coming weeks, we build a web based voting system using the MEAN stack (Mongo, Express, Angular, Node), which we can try out in class. (we follow Joe Lennon's instruction: <http://www.ibm.com/developerworks/library/wa-nodejs-polling-app/>)

This Week (Build a basic Express back-end):

Follow Joe Lennon's Step 1 instruction and answer the following questions:

1. What is Node?
2. What is Express?
3. What is Jade?
4. What are npm modules?
